"The appointment system allowed us to **streamline our services to students and reduce confusion** when scheduling appointments. I enjoy that it will **automatically populate appointments in our outlook calendars** with the student's name for all 10 of our pro-staff members, as well as help us schedule Academic Success Plans with UCI students."

Joanna Hernandez
Student Success Initiatives

TECHNO EXPO

"Appointments has allowed our academic advising office to **streamline our appointment scheduling** and intake process and **drastically free up staff/student staff time**. With the more efficient system in place, our office has been able to **devote more of our attention towards goals that best serve our students and mission**."

Manage schedules and appointments;
Sync with Outlook to automatically block off calendar events

Student Lifecycle

TECHNO EXPO

"Since implementing the Appointments system, we have observed both an **increase in the number of students who meet with our staff**..., and an accompanying increase in the total number of scholarship applications to external agencies. Permitting students to self-book appointments not only **makes booking more efficient** than emailing back and forth, but may also **make our office staff seem more approachable and accessible**."

Courtney Santos
Scholarship Opportunities Program

Student Lifecycle

TECHNO EXPO

"If we can **use technology to reduce barriers** like delayed responses or feelings of intimidation, we can more effectively **empower the student**"

Courtney Santos
Scholarship Opportunities Program

Student Lifecycle

“In the past, students emailed, called or walked in to request consultations for study skills. With Appointments, **students can now choose their own times** from a calendar set by our staff. The application is **flexible**, in that **we can change availability easily and quickly through the interface with Outlook**.”
